

### **Goldendoodle Allergy Information**

If there are dog allergies in the family home, we ask that you please interact with some goldendoodles, indoors and see how you react. Although goldendoodles are considered hypo-allergic not everyone with dog allergies can tolerate them. We suggest you spend a good hour or two inside a home closely with a goldendoodle(s). Please pet the adult dogs and rub your hands on your face. This is extremely important as we take dog allergies very seriously. We have had to have puppies returned to us because allergies were not investigated beforehand. It is extremely hard on the family and the puppy when this happens. I trust you understand. Please contact us asap if you have any concerns that you may be allergic to Goldendoodles.
